

Week 1 Unit 4:

The App Front End

The App Front End

SAPUI5

By embedding SAPUI5 front-end code in a Java application, the SAP Fiori design principles can be leveraged to build great user experiences in Java applications.

Key capabilities

- Build modern HTML5 front ends
- Leverage the SAPUI5 JavaScript library
- Connect to OData in the application back end

Benefits

- Standards-based HTML5 development
- Develop once, run everywhere: Run on any device – mobile and desktop
- Benefit from SAPUI5 code templates and SAP Best Practices to rapidly build applications

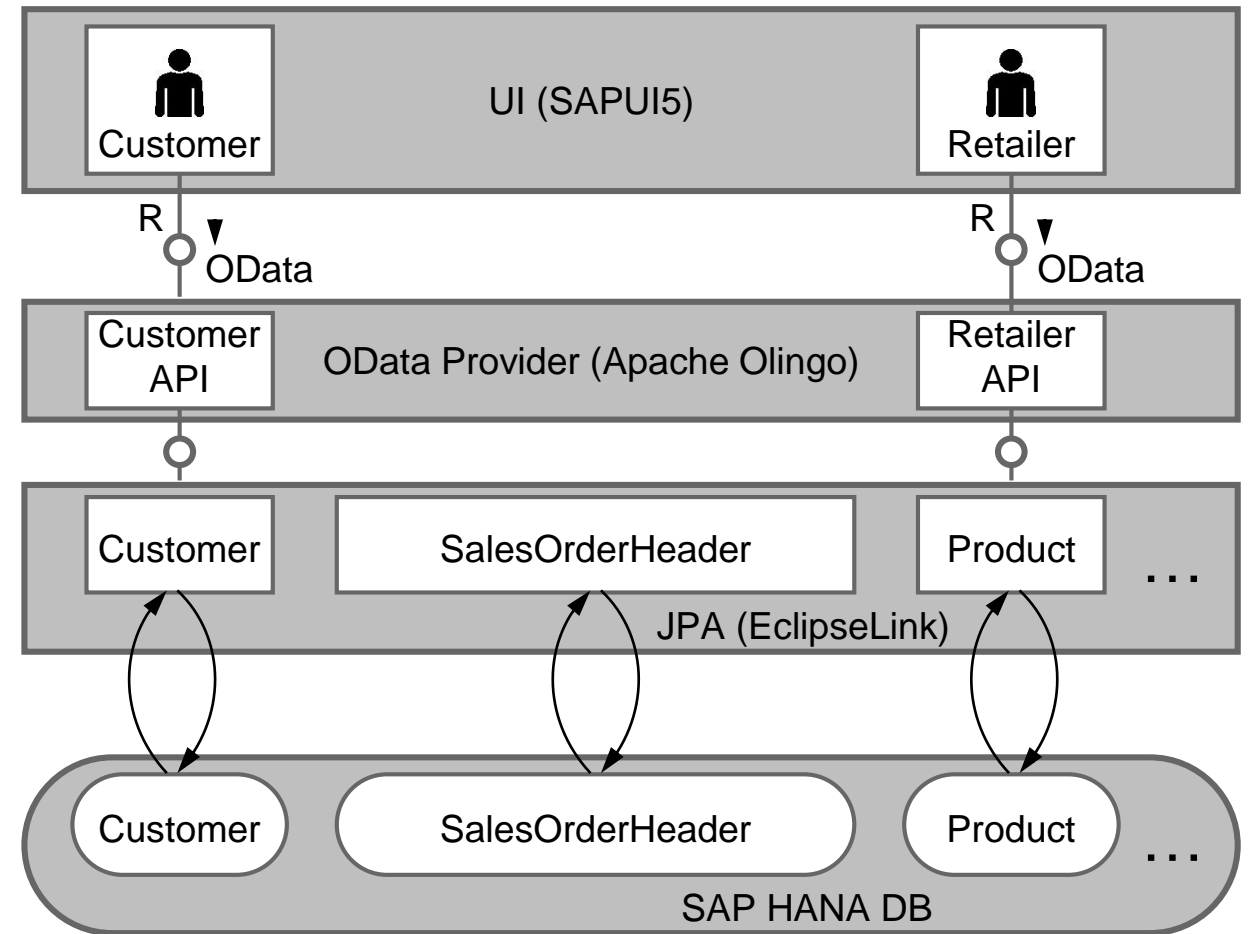

The App Front End

Hands-on

Investigating the ESPM application front end

- Launching the app as a customer in a
 - desktop browser
 - mobile browser
- Launching the app as a retailer in a
 - desktop browser
 - mobile browser
- Investigating the Web module code

The App Front End

What you've learned in this unit

- SAPUI5 capabilities and benefits
- You have investigated the ESPM application front end in the browser
 - as a customer
 - as a retailer
 - in a desktop browser
 - in a mobile browser
- You have investigated the ESPM application front-end code in the Web module

The App Front End
